Peter Jensen is EcoCocon`s sale representative in the whole US. Peter is the consultant and technical adviser for EcoCocon in the US. Peter is the building manager and trains others in building with the EcoCocon straw panel.

He is Danish designer and building consultant with over 20 years of natural building experience. He has traveled the world implementing different humanitarian projects, building sustainable homes, schools, and community buildings. Peter's mission is to make the biggest positive impact through sustainable building practices. He has partnered with EcoCocon to introduce their straw-based natural construction system into his work, serving as a sustainable passive house designer, consultant, and project manager.
