Russell Miller-Johnson, P.E.

Russ has become the go-to engineer for WholeTrees projects with his profound understanding of timber and interest in sustainable engineering design. Miller-Johnson, P.E., Team Leader and Senior Engineer at Engineering Ventures, PC, has over 28 years of progressive experience in the integrated business practice of structural engineering design, management, and leadership. His focus is on advancing sustainable structural engineering practices at multiple levels. He is currently an active member of ASCE SEI's Sustainability Committee. He has presented at Structures Congress' on both sustainability issues and case studies. He has led the structural engineering effort for several LEED certified projects; as well as developing his offices' LCA procedures, green specifications, and detailing approaches.
